[LUCY TOMPKINS] 22-year-old first year med-student, very attractive all-American girl, from a close-knit family of commercial fishermen. Grew up working class in a very rich town (a la the Hamptons). The entire family has sacrificed and placed all their hopes and dreams on her success. She's the first one to go to college, let alone med school. Lucy is bright and has learned impressive surgical skills from gutting fish, but is overwhelmed by the pressure of the workload, the new environment and her family's expectations. She constantly contemplates quitting, but she never will. She has a nervous habit of lying about trivial things to connect with people, then immediately copping to the lie out of guilt. Despite the competitive nature of the school, Lucy has a positive view of people to the point of naïveté. She will also reveal herself to be tougher than everyone thinks. SERIES REGULAR. PLEASE SUBMIT ALL ETHNICITIES.
